MRI BRACHIAL PLEXUS

Part:

Left Brachial Plexus : Plain

Technique:

- Coronal STIR
- Coronal T2W, T1W
- Axial STIR
- Sagittal T2W

Findings:

The roots, trunks, divisions and cords of the left brachial plexus are visualized.

There is no evidence of nerve root avulsion with pseudomeningocele noted on this study.

There is no abnormal mass lesion, hematoma or fibrosis seen around the plexus in the supraclavicular region.

There is no evidence of abnormal signal intensity noted along the brachial plexus.

Impression:

No significant abnormality detected.

Kindly correlate clinically and with other investigation.
